

WS828 Dual Action Cable Stripper

Major Tech's Dual Action Cable Stripper is a versatile tool designed for efficient cable stripping in various applications. This stripper is adept at handling cables ranging from 4mm² to 28mm², offering a broad range of compatibility. Its dual-action functionality allows for easy and precise stripping – simply place the round cable (dia. 4.28mm) in the "V" section, rotate the stripper to cut the circumference of the cable sheath, and then pull up the outer stripper to strip the length of the sheath. The tool is equipped with a sharpened hook and knife function, providing additional versatility for stripping and cutting tasks. For added convenience, a spare swivel blade is included inside the handle. Ideal for production scenarios where efficiently stripping the outer sheet of single or multi-core cables is crucial, this Dual Action Cable Stripper is a reliable addition to your toolkit. With a length of 180mm and a handle length of 110mm, it provides ease of use and precision in cable processing. Upgrade your cable-stripping capabilities with this high-quality and adaptable tool.

Features
