

VETi
Day/Night Sensor

The DNS11 Day-Night sensor automatically turns on or off lighting at dusk and dawn based on set ambient light levels of the sensor. It features adjustable lux settings and integrates easily into new or existing installations. Ideal for outdoor lighting, industrial, commercial, housing applications and security lighting, it enhances energy efficiency and security by activating lights on and off only when needed at night. Simple yet effective, the 10A rated current of the DNS11 enhances convenience and sustainability. Installation must be done by a qualified electrician.

Product Specification

Function	Range
Ambient Light	5 to 50 Lux (Adjustable)
Voltage	220 to 240V AC
Power Frequency	50/60Hz
Rated Current	10A
Mounting	Walls and Poles
Working Temperature	-20°C to 40°C
Working Humidity	<93% RH
IP Rating	IP66 (Outdoor installation)
Standards	IEC 60669-1 / 60669-2-1 AS/NZS 60669.1 / 60669.2.1
